PROFESSIONAL SUMMARY

Entrepreneurial technologist and final-year B.Sc. CS student who turns ideas into working products fast. Founded two agencies — a B2B AI lead-gen agency and an AI automation & creative studio — while shipping 25+ GitHub projects spanning full-stack SaaS apps, Chrome extensions, web scrapers, and AI pipelines. Hands-on builder with deep expertise in AI automation (n8n, LangChain, Hugging Face), no-code workflows, and modern web stacks (Next.js, React, Supabase). Equally comfortable closing a client deal and shipping a production deployment by end of day.

EXPERIENCE

Founder · [Workwise Automations](#) Sep 2025 – Present

- Built and run an AI automation & creative agency serving local Mumbai businesses.
- Produced AI-generated video ads for restaurant, retail, and service clients.
- Engineered an automated AI email-agent system with intelligent ticket routing and human-escalation labels — reducing manual triage by ~70%.
- Developed client-specific n8n/Zapier automation workflows to replace repetitive ops tasks.

Founder · [GrowURevenue](#) Apr 2024 – Dec 2024

- Bootstrapped a B2B lead-generation agency leveraging AI prospecting and no-code automation.
- Built outbound funnels using Clay, Apollo, and n8n; managed end-to-end client delivery.
- Acquired and managed multiple retainer clients, demonstrating full-cycle sales ability.

Student Volunteer – Marketing · [Ramnarain Ruia College](#)

Sep 2023 – Dec 2024

- Led campus marketing campaigns, improving outreach strategies and event promotion.

SELECTED PROJECTS (GITHUB)

SwiftBill – Invoice Management SaaS

Full-stack invoice & expense management system with GST calculation, multi-currency support,

AI Animated Concept Explainer Platform

React web app that lets students enter any topic, generates interactive animated explainer
